

Course Overview

GUE's Dry-suit course is designed to prepare divers for dry-suit diving using proper equipment and techniques. It also provides the opportunity to develop proficiency using your dry-suit, thereby developing more comfort, confidence and competence in the water.

Prerequisites

To enrol in the course, you must be 16 years of age, be a certified open water diver from a recognized training agency, be able to swim a distance of at least 50 feet/15 meters on a breath hold and be able to swim at least 300 yards/275 meters in less than 14 minutes without stopping. Please note that GUE does not allow smokers on any of their courses.

What's Involved

The GUE Dry-suit course is normally conducted over a very intense 2 day period. Combining lectures and practical (in-water) sessions, this course focuses on increasing dry-suit proficiency through proper control of buoyancy, trim, propulsion, teamwork and other GUE principles.

Course Skills

Propulsion and manoeuvring techniques, wing and dry-suit inflator free-flows, managing your equipment, Valve drill, S-drill, teamwork, ascent and descent procedures, buoyancy and trim.

Why Do the Course?

Have you recently purchased a dry-suit and now want some training? Have you been diving in a dry-suit for a while but still don't feel comfortable? The aim of this course is to ensure that you dive your dry-suit rather than the suit diving you. This is a very comprehensive course, approximately twice as long as standard dry-suit courses. As such you get much more in-water time to practice your skills, as well as integrating management of your dry-suit with all your foundational skills. However even with twice the usual time, please remember that there are no shortcuts to becoming proficient. It's all about in-water time and practice practice practice!

What's Included

The course fee covers all instructional time, gas fills and pool fees. Students pay certification and course material costs directly to GUE. Gear hire is not included.

What You Need

All GUE courses are taught in the standard GUE gear configuration. For more details visit our website or for specific questions please contact your instructor. If required all the necessary equipment is available for rental for the duration of the course.

Student testimonials

"I had already done a standard dry-suit course but still didn't feel that I was in control underwater. After this course I am finally looking forward to diving again – thankyou Jamie, thankyou TechDive."
[David R. – Auckland]
