

Course Overview

The GUE Fundamentals course is the gateway into all GUE training. It is designed to cultivate the essential techniques required for all good diving practices, irrespective of level or environment. It will help the recreational diver to advance his/her basic diving skills, thereby developing more comfort, confidence, and competence in the water. It also provides the more experienced diver with the necessary tools to get the most out of future technical diver training courses.

Prerequisites

To enrol in the course, you must be 16 years of age, be a certified open water diver from a recognized training agency, be able to swim a distance of at least 50 feet/15 meters on a breath hold and be able to swim at least 300 yards/275 meters in less than 14 minutes without stopping. Please note that GUE does not allow smokers on any of their courses.

What's Involved

The GUE Fundamentals course is normally conducted over a very intense 4 day period. Combining lectures and practical (in-water) sessions, this course is designed to introduce students to the basic GUE concepts and build competence in important areas such as buoyancy, trim, propulsion, teamwork and the GUE equipment configuration. Course requirements include a minimum of eight hours of academics and five dives.

Course Skills

Finning techniques, including helicopter turns and back-finning; valve drills; out-of-gas drills; SMB deployment; unconscious diver recovery; buoyancy and trim; teamwork and communication.

Why Do the Course?

This course will appeal to all divers looking to improve and test their diving skills. Whilst of particular interest to those beginning technical diving, it is flexible enough to help develop fundamentally better skills in all divers.

What's Included

The course fee covers all instructional time, gas fills and pool fees. Students pay certification and course material costs directly to GUE.

What You Need

All GUE courses are taught in the standard GUE gear configuration. For more details visit our website or for specific questions please contact your instructor. If required all the necessary equipment is available for rental for the duration of the course.

Student testimonials

"With each course I do with TDNZ, each course bettering the last, I seriously wonder what they have lined up next for me. One thing is for sure, with the level of training and quality of these instructors, they will continue to get my custom." [Rob W. – Wellington]
